

"reinvents the air surveillance" ⁽¹⁾

New comer in aeronautics, **ASMAN Technology develops, markets and operates light aerial surveillance solutions** built around a compact

proprietary data link and a modular mission system able to cover a wide range of missions. Truly integrated system, our solutions incorporate encrypted transmission technology that simultaneously uses 4G and HF networks to ensure optimal range towards a ground station.

**Our team is waiting for you
Static Display – A8**

Paris Air Show, 17-23/06/2019
